

SUON PISEY

Web and Software Development

As a Full Stack Developer, I build dynamic web applications using Next.js, React, and Spring Boot. I create clean, reusable frontend components and integrate robust backend APIs for seamless data flow. I implement state management, responsive layouts, and secure JWT authentication. I prioritize accessibility, maintainable code, and optimal performance. I collaborate with teams to deliver scalable, efficient, and visually appealing applications.

Experience

Hanuman Beverages Web Application Developer (2026-Present)

As a Web Application Developer, I design and build complete web applications using Angular for the frontend and .NET for the backend. I develop and integrate RESTful APIs to ensure seamless communication between systems. My experience includes managing Oracle and PostgreSQL databases with a focus on performance, scalability, and reliability. I implement secure authentication using JWT and manage role-based access control to protect application resources. Working closely with cross-functional teams, I help plan, develop, test, and deploy scalable software solutions. I use Git, Visual Studio, and Azure DevOps for version control, collaboration, and project management. My goal is to create efficient, secure, and user-friendly applications that meet business requirements and deliver a high-quality user experience.

Online ISP Web Application Developer (2024-2026)

As a Full Stack Developer, I design and build complete web applications using Next.js for the frontend and Spring Boot for the backend. I develop and integrate RESTful APIs to ensure seamless communication between systems. My experience includes managing Oracle and PostgreSQL databases with a focus on performance and reliability. I implement secure authentication using JWT and handle role-based access control. Working closely with cross-functional teams, I help plan, test, and deliver scalable software solutions. I use Git, Maven, and Gradle for version control and project management. My goal is to create efficient, secure, and user-friendly applications that meet business needs.

Cubetiq Solution Frontend Developer & Technical Support (2022–2024)

Progressed from Technical Support to Frontend Developer, providing system support and troubleshooting while developing responsive web applications with React and Next.js, integrating APIs, optimizing performance, and collaborating with cross-functional teams to deliver high-quality solutions.
